What is Transport 2050?

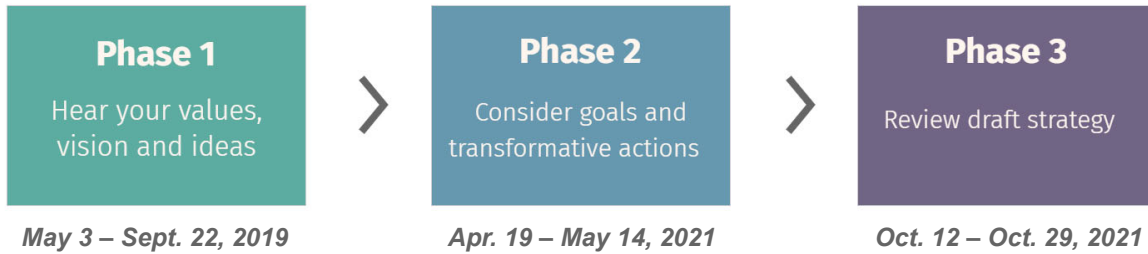

- Provides the 30-year **blueprint** for regional transportation projects, policies, and programs
- A shared strategy: in partnership with **Metro 2050**, **Climate 2050**, staff from **municipalities**, and the **Province**
- **Previous plans** have **shaped the region**, and options for getting around

Shape the future of
how we move. And live.

About Transport 2050 Engagement

What You Told us in Phase 1: Values, Concerns, and Priorities

VALUES	CONCERNS	PRIORITIES
People most value about the region and their neighbourhoods: <ol style="list-style-type: none"> 1. Natural areas and parks 2. Access to shops and amenities 3. Proximity to transit 	People are most concerned about: <ol style="list-style-type: none"> 1. Housing affordability 2. Road congestion 3. Climate change 	As the region changes, people want to prioritize: <ol style="list-style-type: none"> 1. Transit expansion and improvement 2. Transportation options that are timely and convenient 3. A transport system that's cost-effective and efficient

Phase 2: Consider Goals and Transformative Actions

We asked to what extent people support

5

Draft goals

3

Transformative

actions

Priorities: receiving **high-quality feedback** and engaging with people of **diverse**

backgrounds

Transport 2050: 5 Goals

1. Convenient Choices

We all have abundant, universally accessible choices allowing us to conveniently connect to opportunities without needing to rely on a car.

2. Reliable Choices

We all have reliable choices that get us where we need to go on time.

3. Affordable Choices

We all have affordable choices so that people of all incomes can easily live and move in this region.

4. Safe & Comfortable Choices

We all have safe and comfortable choices that make us all healthier and happier.

5. Carbon-Free Choices

We all have transportation choices that are carbon-free, supporting global efforts to respond to the climate emergency.

Action 1: People-First Streets That Invite Walking, Biking and Rolling

- ✓ Strong support across demographics and across region
- People liked reducing region's dependence on autos, but implementation matters

Action 2: Fast and Frequent Rapid Transit That's a Competitive Choice for Most Longer Trips

- Support for both network proposals, slight preference for street-level rapid transit
- People identified trade-offs between above/below ground versus street-level rapid transit

Action 3: Automated Vehicles That Provide Convenient Access to Car Trips, Without Adding to Congestion

- In general, supported the vision for managing automated vehicles
- More mixed support for using fees to manage zero passenger trips or congestion
